

Invoice Management

1. Overview

This document provides a detailed guide for managing stores, admins, and invoices within the system. It defines the roles of **Super Admin** and **Admin**, their respective permissions, and the workflow for creating and managing invoices.

- Super Admin and Admin passwords must follow security guidelines.
- Logs should capture all create/update/delete actions for accountability.
- Ensure data validation for all forms.

2. Roles and Responsibilities

2.1 Super Admin

- **Description:** The Super Admin has the highest level of access and controls the system configuration.
- **Key Responsibilities:**
 - Create, edit, and delete stores.
 - Manage Admin accounts (create, update, delete).
 - Monitor system activity and generate reports.

2.1 Admin

- **Description:** Admins are associated with specific stores created by the Super Admin.
- **Key Responsibilities:**
 - Manage invoices for their respective stores.
 - View store-specific reports.
 - Handle customer billing and payment records.

3. System Workflow

3.1 Super Admin Workflow

1. Log in to the system using Super Admin credentials.

2. Create stores and assign Admins.
3. Monitor system activity and ensure all stores are operational.
4. Generate system-wide reports if required.

3.2 Admin Workflow

1. Log in using Admin credentials.
2. Navigate to the assigned store's invoice section.
3. Create and manage invoices for customers.
4. Generate store-specific reports for sales and inventory.

4. Access Control

- The **Super Admin** has full access to store management, enabling them to create, edit, and delete stores.
- The **Super Admin** has full access to admin management, allowing them to add, update, or remove admin accounts.
- The **Super Admin** has view-only access to invoice management, enabling them to monitor invoices without making changes.
- The **Admin** has no access to store management, meaning they cannot create or modify stores.
- The **Admin** has no access to admin management, preventing them from managing admin accounts.
- The **Admin** has full access to invoice management, allowing them to create, edit, and manage invoices.
